Designing complex, data-rich workflows and high-stakes interactions across SaaS, productivity, finance, and global multi-platform products.

EXPERIENCE

JO'DISCO • Design Consultant Nov 2025 — Present • Remote

- Automation, design, and e-commerce systems for small businesses and independent operators, built on years of prior design and brand work.

Passportmonie • Product Design Consultant Aug 2025 • Africa

- Led designs for multi-country transaction systems that cut cross-border failure rates by **27%** and reduced support tickets tied to payment errors.
- Re-architected wallet flows (funding, verification, card actions), decreasing task completion time by **~35%**.
- Consolidated fragmented money movement journeys into a single, predictable model used across web + mobile.

MetaMask (Consensys) • Product Designer Mar 2023 — Jul 2025 • United States

- Led design for the MetaMask Card across platforms, shaping a financial experience used by **30M+** global users with **<2%** error rates on core tasks.
- Rebuilt a high-friction checkout path, improving step-to-step clarity and boosting successful completions by **~18%** across crypto and fiat rails.
- Designed developer integration surfaces that reduced SDK integration time by **~40%** for Dapps adopting real-time alerts.
- Drove alignment across PM + engineering, accelerating release cycles for critical payments features by multiple sprints.

HAL.xyz • Senior Product Designer Aug 2022 — Mar 2023 • United Kingdom

- Developed automation and data workflows that contributed to a **30%** lift in retention and an **80%** user satisfaction score across DeFi tools.
- Reduced setup friction for complex triggers, shortening time-to-value by **50%** for power users.
- Introduced modular interaction patterns that later powered integrations across multiple partner apps.

Kippa Africa • Lead Product Designer Oct 2021 — Sep 2022 • Lagos, Nigeria

- Led design for core business tools (inventory, bookkeeping, reporting), driving double-digit adoption growth for new merchants.
- Built the first design system, cutting engineering delivery time by **40%** and improving cross-team design consistency instantly.
- Mentored product designers and established workflow rituals that removed delivery bottlenecks and improved team performance and design output quality.
