

Praise Fabilola

Senior Product Designer

fabilolaemmanuel@gmail.com | praisefabilola.framer.website | LinkedIn @praisefabilola

Designing complex, data-rich workflows and high-stakes interactions across SaaS, productivity, finance, and global multi-platform products.

EXPERIENCE

Passportmonie

Product Design Consultant • Aug 2025 — Africa

- **Led designs** for multi-country transaction systems that cut cross-border failure rates by 27% and reduced support tickets tied to payment errors.
- Re-architected wallet flows (funding, verification, card actions), decreasing task completion time by ~35%.
- Consolidated fragmented money movement journeys into a single, predictable model used across web + mobile.

MetaMask (Consensys)

Product Designer • Mar 2023 – July 2025 — United States

- **Led design for the MetaMask Card** across platforms, shaping a financial experience used by 30M+ global users with <2% error rates on core tasks.
- **Rebuilt a high-friction checkout path**, improving step-to-step clarity and boosting successful completions by ~18% across crypto and fiat rails.
- Designed developer integration surfaces that reduced SDK integration time by ~40% for Dapps adopting real-time alerts.
- Drove alignment across PM + engineering, **accelerating release cycles** for critical payments features by multiple sprints.

HAL.XYZ

Senior Product Designer • Aug 2022 – Mar 2023 — United Kingdom

- Developed **automation and data workflows** that contributed to a 30% lift in retention and an 80% user satisfaction score across DeFi tools.
- Reduced setup friction for complex triggers, **shortening time-to-value by 50% for power users**.
- Introduced modular interaction patterns that later powered integrations across multiple partner apps.

Kippa Africa

Lead Product Designer • Oct 2021 – Sep 2022 — Lagos, Nigeria

- Led design for core business tools (inventory, bookkeeping, reporting), driving **double-digit** adoption growth for new merchants.
- **Built the first design system**, cutting engineering delivery time by 40% and improving cross-team design consistency instantly.
- **Mentored product designers and established workflow rituals** that removed delivery bottlenecks and significantly improved team performance and design output quality.

Skills

Product Design, UX Design, UI Design, Systems Thinking, Interaction Design, User Research, Usability Testing, Prototyping, Wireframing, Workflow Optimization, Information Architecture, Design Systems, Data-Driven Design, Multi-Step Flow Design, Cross-Functional Collaboration, Rapid Iteration, End-To-End Product Delivery, AI-Accelerated Workflows, Developer Tooling, Real-Time Data UX, Dashboard Design, High-Stake Decision Flows.

Tools & Domains

Figma, Framer, Webflow, Midjourney/ AI Tools, Replit, HTML/CSS, Jira, Notion, Miro.
